PROJECTS

Data Drift Reporter

Python, Pandas, NumPy, Flask, HTML, CSS

- Built a Python tool that takes two CSV files and flags differences in data patterns between them.
- Applied Pandas DataFrames and NumPy functions to measure how much the data shifted over time.
- Used Flask to build a simple web interface and output a clear report showing which columns drifted and by how much for quick data validation.

Expense Tracker – Personal Project

- Built an Expense Tracker using Pandas and NumPy to analyze spending data from CSV files and display category-wise totals on a Flask web dashboard

INTERNSHIP / CERTIFICATION

Data Science Internship – Pantech E Learning Pvt. Ltd.

May 2025

- Completed internship training in Data Science concepts and Python programming.
- Worked on basic data analysis and problem-solving tasks.

ACHIEVEMENTS

- Gained hands-on experience in data analysis and web dashboard development during internship and projects
